### **ExploitEdge Cybersecurity Bootcamp | Phase I**

The **Department of Computer Science & Engineering**, in collaboration with the **Wipro Cybersecurity Centre of Excellence**, KIET, successfully organized the first phase of the **ExploitEdge Cybersecurity Bootcamp on 19th August 2025**.

#### **Who joined?**

- 96 enthusiastic **2nd year B.Tech students**

#### **Bootcamp Objectives:**

- Learn the fundamentals of Linux and its role in cybersecurity
- Explore web application penetration testing
- Understand steganography and its real-world uses
- Solve picoCTF challenges to sharpen problem-solving skills

#### **Hands-On Topics Covered:**

- Linux basics, kernel, and why Kali Linux matters in cybersecurity
- Web Pentesting fundamentals: request-response cycle, GET & POST, Chrome DevTools
- Introduction to Steganography: concepts, applications, and using Exiftool
- Practical CTF challenges to apply learning

With a perfect blend of **concepts and practice**, the bootcamp is bridging the gap between classroom learning and **real-world cybersecurity skills**.

### ExploitEdge Cybersecurity Bootcamp – Day 2 Highlights

The **Department of Computer Science & Engineering**, in collaboration with the **Wipro Cybersecurity Centre of Excellence**, KIET Group of Institutions, successfully conducted the second phase of the **ExploitEdge Cybersecurity Bootcamp**.

♦ **Participants:** 65 enthusiastic 2nd-year **B.Tech** students

♦ **Objective:** Bridging the gap between theory and practice with hands-on cybersecurity training

#### **Day 2 Focus Areas:**

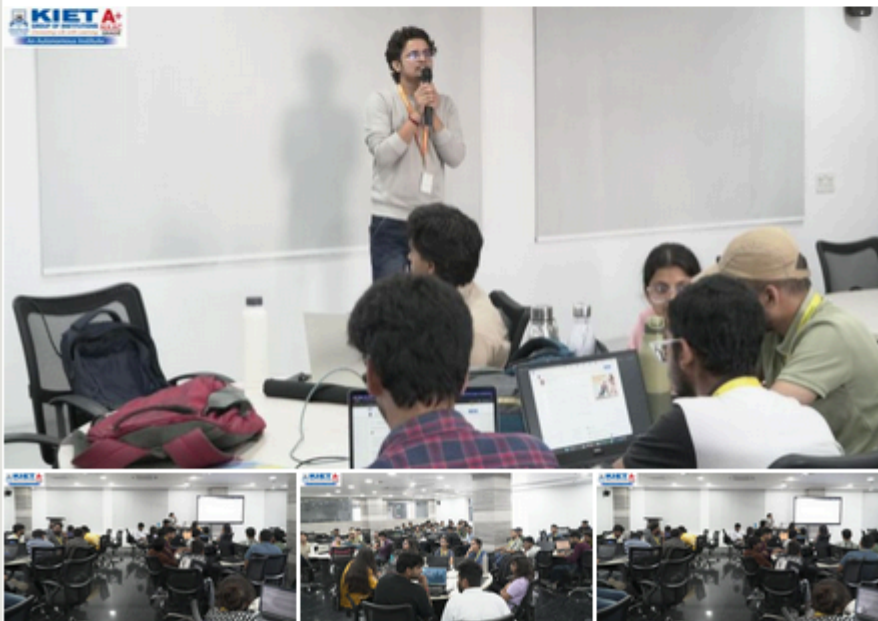

♦ **OSINT Techniques** – Geoguessing, Marine OSINT, Google Dorking

♦ **Web Pentesting** – Burp Suite, Burp Proxy, GET & POST Requests, Base64 Encoding/Decoding

♦ **picoCTF Challenges** – Building real-world problem-solving skills

The bootcamp continues to empower students with **practical cybersecurity skills** and ignite their passion for ethical hacking and information security.
